

## **David C. Zawieja, PhD**

**Professor and Associate Department Head, Systems Biology and Translational Medicine**

**Director, Division of Lymphatic Biology**

**Texas A&M University System Health Sciences Center**

**Professor of Medical Physiology**

**Director of the Division of Lymphatic Biology**

**Cardiovascular Research Institute**

Dr. Zawieja received his Ph.D. in Physiology from the Medical College of Wisconsin, and conducted his post-doctorate work in Medical Physiology at Texas A&M University, where he is currently a Professor in the Department of Medical Physiology. The focus of his research is the generation and regulation of lymph flow, investigating the mechanisms by which physical and humoral factors alter lymph pumping. Through these studies, Dr. Zawieja's research is aimed toward advancing the basic understanding of lymphatic function needed to advance the development of lymphatic medical therapies. Dr. Zawieja is a reviewer for many academic journals and an Associate Editor for *Microcirculation*, and *Lymphatic Research and Biology*. He is the Director of the Division of Lymphatic Biology of the Cardiovascular Research Institute at TAMUS HSC, and the Director of the Physiological Imaging Facility. Dr. Zawieja received a NIH National Research Service Award, and a NIH Research Career Development Award. He has been the Principal or Collaborating Investigator on numerous lymphatic research proposals from NIH, AHA, NASA-NSBRI and TAMUS. Dr. Zawieja is a published author in several academic journals and books, with numerous articles, chapters and reviews on lymphatics.
